Professional Profile

My career to date includes a strong focus on refactoring legacy backend code for large applications, making the PHP/MySQL stack my strength.

However, I also enjoy expanding my comfort zone to Frontend and DevOps through side projects, where I also experiment with the current frameworks, design patterns, and other modern technologies.

Expert - Technologies used on an everyday basis for 5+ years, serving millions of users per day.

- PHP, MySQL, Git, HTML, Bootstrap, CSS,

Familiar - Technologies used in side projects, or on a semi-regular basis for 5+ years.

- Laravel, Rest APIs, PHPUnit, Selenium, JQuery, Javascript, VueJS, ES6, LESS
- Gulp, Vagrant (Homestead), Linux, NGINX, Apache

Work History

April 2014 – February 2016
Senior Software Developer, Accretive Technology Group

- Port legacy payable library to REST API used across multiple products.
- Built user + internal facing system for submission, review, storage of documents (Drivers License, Passports, etc).

October 2011 – April 2014
Software Developer, Accretive Technology Group

- Tool allowing users to query clients based on certain spending habits, and build inmail campaigns targeting those clients.
